The Exchequer openeth 8. dayes before any Terme  
 begins, except Trinity Terme, before which it openeth  
 only 4. dayes.

## A Prognostication.

**F**OR the hearing, and determining of all Contracts, discords, and such like matters in the Common wealth, these 4. times, commonly called the *Termes*, be appointed, in which the learned Iudges set an end of contention, and debate betweene party and party.

Euery of these 4. *Termes*, consists of 4, 5, or 8. *Returnes*, euery *Returne* of 4. dayes, & euery day seruing vnto a seuerall purpose.

Note then, that euery *Terme* hath part, or all these 6. kind of *Returnes*, viz. *Crastino Octabis*, *Quindeno*, *Tres*, *Mense*, & *Quinq*; *Crastino*, is the morrow after the *Basis*, or day nominated; as *Crastino Trinitatis*, is the morrow after *Trinity* Sunday, it being the *Basis*, and day that giues the denomination. *Octabis* is 8. dayes after inclusiuely. *Quindeno* is 15. after. *Tres* that day 3. weekes. *Mense*, that day Moneth, and *Quinq*; that day 5. weekes.

Now euery of these *Returnes*, hath 4. seuerall dayes, whereon they consist: the first whereof hath a double signification, the one is the day of *Returne*, and the other the day of *Essoyne* for the Defendant, in a personall action, or the Tenant in a reall action, to be *Essoyned*. The second, is the day of *Exception*, for the Plaintiffe, or demandant to lay an *Exception*, if no *Essoyne* be cast, that the Defendant shall not bee *essoyned*, or amerced. The 3. is, *Returna Brevium*, that is, the day whereon the Sheriffe must returne the *Writ*; The 4th, is the day of Appearance for Parties, and Iurors in the Court of *Common Pleas*.

If any of these dayes fall vpon an Holiday, that is no Court day, as in *Hilary Terme*, vpon the day of the *Purification*: In *Easter Terme*, vpon *Ascension* day: In *Trinity Terme*, vpon the Natiuity of *St. Iohn Baptist*: And in *Michaelmasse Terme* vpon the day of *All Saints*, or vpon any Sunday (all which, be no Court dayes) then must the next day following serue for both: As if the *Essoyne* day fall vpon a Sunday, then Monday must serue for the *Essoyne* day, and the day of *Exception* both.

These dayes, haue all most vse in the Court of *Common Pleas*.

But Latitates, or other Proccesse vpon a Bill certaine, it is vpon a day certaine: As *Die Lune proximo post Purif*: which must alwayes be reckoned from the *Essoyne* day,

# Woodhouse. 1633.

In the Starre-Chamber, Chancerie, Court of Wards, and Court of Requests, they vse none of these Returnes, but onely the day of Appearance, which is *Quarto die post*.

Yet note well, that if a *Capias*, *Exigent*, *seire facias*, or a *Distringas* be executed after the day of Essoyne, by the Sheriffe or a Commission late vpon out of any of the aforesaid Courts, after the sayd Essoyne day, it is neither justifiable, nor warrantable.

The Law-dayes in the Courts of the *Arches*, *Audience*, *Prerogative*, *Consistory* in *Pauls*, *Delegates*, *Admirall Court*, and *High Commission*, as they be usually kept in the Terme time.

In Hilary Terme {  
*St. Hilary*, 13 } of January.  
*St. Wolstan*, 19 }  
*Conv. of St. Paul*, 25 }  
*St. Scholastica*, 10. of February.

In Easter Terme {  
*Quindeno Pasch.* 6 }  
*St. Gordian*, 10 } of May.  
*St. Dunstan*, 19 }  
*Ascension day*, 30 }

In Trinity Terme {  
*Corpus Christi*, 20 }  
*St. Iohn Baptist*, 24 } of Iune,  
*Conver. of Paul*, 30 }  
*Trans. of Thomas*, 7. of Iuly.

In Michaelmasse Terme, = {  
*St. Faith*, 6 }  
*St. Edward*, 13 } of October.  
*St. Luke*, 18 }  
*St. Simon & Iude*, 28 }  
*Craftin. Animar.* 13 }  
*Craft. Martin.* 12 } of Nouemb.  
*Edmund King*, 19 }  
*St. Katherine*, 5 }

## A Prognostication

**T**he first day after every of the feasts set downe for every Terme, the Court of the Arches is kept in the forenoone in Bow-Church: And the Admirall Court the same day in Southwarke, in the afternoone.

The second day after every of the said feasts, the Audience Court is kept, in the forenoone in the Consistory in Paules, and the Prerogative Court in the same place, in the afternoone. The 3. day following every of the said feasts, the Bishop of London, his Consistory Court is holden in Pauls in the forenoone, & his Marshalls Court of Delegates, in the same place in the afternoone. The 4. day following the said feasts, his Majesties Court of High Commission, is kept in the Consistory in Paules, or (as of late yeares) at Lambeth, or in the Lord Bishop of London his pallace, on Thursday afternoone. But if any of the dayes before recyted bee Sunday, or an Holy day, then is such Court kept the day following.

In Hilary Terme, 4. of the abone named Court dayes be ordinarily kept, and as many in Easter and Trinity Termes: according to the course of the yeare, as the Judge in the Arches in his discretion shall thinke good. Who at the end of every Terme appointeth the Court dayes to be kept in the next Terme, but in Michaelmas Terme, the Court dayes (if they be not altered) were wont certainly to be kept.

I therefore advise all Country men (especially those that dwell farre off) being cyted by any originall processe to appeare in the Arches, Audience, Prerogative, or Delegates, to send to some Proctor, a note of the cause, and to what Court they be cyted, to appeare for them, and to returne them word of the very day in which it shall be needfull for them to appeare in person.

But in the course of practice in the High Commission, and the Admirall Court, it is otherwise, for every person cyted to those Courts, must appeare personally.

The Termes, with the Act, and Commencement  
dayes in both the Vniversities.

**H**illary Terme, beginneth in both, January the 14. and  
endereth at Oxford, the 13. of April, and at Cambridge,  
the 17. of April.

Easter Terme, beginneth in both, May the 1. endes at Ox-  
ford, the 6. of June, and at Cambridge July 1.

Trinity Terme, begins at Oxford, June the 19. and ends  
July 13. but may be prozogned, ad Magistrorum bene placitum.

Michaelmas Terme, begins in both, the 9. of October,  
and ends December the 16.

The Act, or Commencement of Bachelors in both, is  
the first day of Lent, March the 6.

The Act of Doctors, and Maisters in Cambridge, is Ju-

## A Prognostication.

Generall Obseruations, and profitable to be regarded.

**R**emoue, and let young Trees, from October vntill February, setting alwaies that side towards the Sun, which was before, the wind Southerly, or at West, the weather warme, dry, and in the new of the Moone.

Graft, and plant trees, the Moone bring new, in Taurus, Virgo, or Capricorn, in faire, dry weather, wind S. or West.

Cut Vines in December, or January.

Fell Timber, to continue, and be without woymes, in December, or January, 2, or 3 dayes before the Moones change. If you will haue it to grow again, in the new Moone is best.

Cut Hedges, betweene the Change and full Moone, from the end of January, vntill May.

Sheare Sherpe, cut haire, and sow all manner of Corne in the new of the Moone.

Set and sow all kind of Seeds, the Moone in Aries, Taurus, Cancer, Virgo, Libra, Capricornus, Aquarius, or Pisces: but for Seeds whose rootes be round, should be sown, or set 3, or 4, dayes, before the full Moone, or after.

Dung land, that weeds may not abound, in the last quarter.

Cut, or kill Cattell, the Moone in Aries, Libra, or Sagittarius, after full Moone: but you may let them blood, at any time, the Signe not being in the heart, nor in the place where the incision is made, nor in the day of the Moones change.

Gather Flowers, or Seeds, such as you mind to keepe all the yeare, at the full Moone. Dry your flowers in the shade till they be almost dry, and then Sun them a little, least they mould, or corrupt. Doe the like with your Seeds, but they will endure the beames of the Sun.

Gather Apples, and Wardens, in the last quarter of the Moone; lay every sort by it selfe (without any fallings among them) upon bare boards, or on a Plaster flooze, vntill the end of November, the thinner they lye the better, let the place be close shut in frosty weather, & extreme cold; then to cover them ouer with fine Hay, or Warly chaffe, will not be amisse: but Wardens so gathered, and layd on dry boards, need no covering.

Profitable

# Woodhouse. 1633.

## Profitable Rules in Gardening.

In the Southern parts, neare the Sea, Gardening may be more timely done, than Northward, and in the midst of this Land, where the ayre is not so warme, and favourable.

2 In setting hearbes, leave no top more than an handfull above the ground, nor more then a foot deepe in the earth.

3 Twine the roots of those slips you set if they will abide it, but Gilliflowers are too tender.

4 Set more, and sow dry.

5 Set slips at any time, except about Midsummer, or in frosts.

6 Seeding spoyle the most Rootes, by drawing the heart, and sap from them.

7 Gather for the Pot, and medicines, hearbes tender and greene, the sap being in the top, but in Winter the root is best.

8 All hearbes once in seaven yeares should be renewed, except Rosemary.

9 These require whole plots. Artichokes, Cabbages, Turneps, Parsneps, Onions, Carrets, Saffron, and Sheretts.

10 Gather all your seedes, dead ripe, and dry.

11 Lay no dung to the rootes of your hearbes, for dung not rotted, is too hot, even for trees also.

12 Thin setting, and sowing, (so that the rootes stand not above a foot distance) is profitable; for the hearbes will like the better, and greater hearbes require more distance.

13 Set, and sow hearbes in their time of growth (except about Midsummer, for then they are too tender) but trees in their time of rest.

14 A good Huswife may, and will gather store of hearbes for the pot about Lammes, and dry, and pound them, which in Winter will doe her good service.

15 Weed your Garden with weeding blades of Angers, after a showre of raine, and let the Weeder learn to know hearbes and Trees, from weeds,

## A Prognostication

### Generall Rules of Physicke.

**C**ut no Weyne noz let Blood, when the Signe is in the place where the incision is to be made, neither when the Sun o2 Moone are afflicted with the malignant Planets, Saturne, o2 Mars: let it be done in the Morning, after the Sun rising, & while the patient is fasting; If in the afternoone, then after perfect digestion, the ayre being temperate.

In letting of Blood, the Physitian, o2 Chyrurgion must be carefull of his patient, for many times the carelesse, and vblearned, by letting of Blood, open a way to dangerous infirmities, & sometimes to present death. It is not conuenient, that a leane o2 weake man, o2 woman, o2 one that is very fat, o2 grosse, noz for a Child to be let blood. It is to be considered, how it standeth with the Patient inwardly for his Complexion, and Age, for the time of the yeare, and of the day. Therefore it is best to let blood in faire, temperate, and Sun shine weather, not to sleepe presently after it, noz to stirre violently.

The best times to let Blood be, for the Sanguine the Moone being in Cancer, o2 Pisces. For the Melancholicke, in Libra, o2 Aquarius; and for the Phlegmaticke, in Aries, o2 Aquarius.

For

For the Phrensie, and Pestilence, Squinancie, Plurisie, Apoplexie, continuall Head-ach, hot burning Feauer, or any other extreame paine, or dangerous disease, remedy must be sought with all convenient speed, but then Blood is not to be let in so great quantity, as if a chosen time might be taken.

It is best to Bathe, the Moone in Aries, Leo, or Sagitarius for health, but for cleanlinesse in Libra, and Pisces.

Sweatings as they are of two sorts, that is Naturall, and Artificiall, so they be for two purposes. The Naturall sweat (good heed being taken in opening the pores) will dissolue grosse, and thicke humors, will cleanse the Blood, will comfort the spirits, will drive away Cold, will helpe Summers and the Droopie. The Artificiall sweat, will cleanse sores, put away Itch, amend dulnesse in hearing, ease the Stone, dissolue the congealed and cold Melancholy blood, and humors. But for the better performing, and effectuall working in these cases, the counsell of the learned Physitian is to be desired, who will consider many Astrologicall observations necessary in Blood-letting.

The best times to sweat in, are the Moone being in Aries, Leo, and Sagitarius.

## A Prognostication.

Notes of Husbandry, with some other things to be  
considered, in every Moneth of the year.

**H**usbandry doth alter according to the Nature, of Countries, for as the earth, the ayre, the little, or much heat, cold, or moisture doth increase, or diminish: so must good Husband men change their seasons, labours & instruments. In the fruitful Vales of this land, where is little clay, and in all other places of the like nature, tillage must begin betime in the year, the Plowes, and other implements must be large, and strong, the labour great, and painefull; In light & fertile fruitfull, arrable soyle should be begun at later seasons, the Plowes, other necessities, and labours are to be somewhat lesse then the other; In light sandy grounds, that be fruitfull, their seasons be latest, their furniture, and labour least. Butly in barren, and unfruitfull soyle the first season of the year is to be considered, for in all places (*Anus fructificat non aget*) and the Plowes, and implements must euer be fitted to the nature of the ground.

### January.

**N**ow cut downe Timber, in the last quarter of the Moon. Kill fruit-trees of superfluous branches, and cut out their roots, breach cattell; Kill and geld for rearing; Kill more trees if the frost be not too hard, set in sow hurnels, & berries; Set quicksets, Rose trees, Peaches, Filberts, and Plum trees; Sow or set Pease, and Beans, fallow land, trench gardens with dung; Remoue Bees, and for your health keep your body warme; Les good, and wholesome dyet be your Dyettion, and rather with exercise, and labour, that fauce increase your appetite to meat.

### February.

**S**et, or sow all sorts of Pease, Beans, and other Pulse; Sow Mustard seed; Cut up ditches; Set, and plant, Vines, Apples, Goose berries, and any fruit that grows upon little bushes; Prune, and trim all sortes of fruit-trees from Apples, Cankers, and all superfluous branches;

## Woodhouse. 1633.

Great wardens, and Peates at the end of this month; Sow  
Oates in cold, and stiff land; Take heed of cold, for beares  
mentes that are flimy, and flegmaticke, and if great need  
require Purge, Bath, or bleed as the fullfull Moone went out  
March.

In the newe of the Moone (the winde South or west)  
grasse, and make an end of sowing all manner of Oals, and  
begin to sow Oates, Barly, Onions, Parsneps, Carrets,  
Cucumbers, and all kinde of Pothearbes; Dilope Brer-  
chokes, and Sage; Geld Lambes; Let blood according to  
your youth, strength, and necessity, the signe, and weather  
being fit; whatsoeuer disease cannot in the Spring time be  
cured by Physick, will hardly be rid all the yeare after.

### April.

Sow Barly, Hemp, and Flax, Hole Hops, Set and sow  
all sorts of garden Herbes; Open Hives, and let Bees  
labour for their living, now the time beginneth to bark trees.  
Good housewives or husbands about their dayties; Bleed, and  
purge, but by direction of the learned, and they that have  
itches or be troubled with Gout, let them go to the Bathes  
in this or one of the two next Moneths.

### May.

Sow Barly betime (else looke for a late harvest, and little  
profit) Hemp and Flax, and all manner of fine herbes, and  
tyes; Take Lambes from their dams; Let the lopping of  
trees; Weed gardens Teach Hops to climb, but cut of the  
superfluous branches; Set Hills to worke; Gather Hops  
late; Rise early, and walke in fragrant fields, and neere  
sweet running streames; Sage, and sweet mafe better in  
now an excellent breakfast, Clarified whey, and sage ale for  
weak stomachs and drinke.

### June.

Sow Wheat; Bring home skwell; Weed corn, and  
gardens; Sow Rosemary, Carnations, & Wallflowers;  
Sow Lettice, & Radish seed; on 4. dayes after the full, for  
they will not run to seed; Set Sallies; Make hay  
care

## A Prognostication.

carry Sand, Lime, Marle, and manure of what kinde soeuer to your land. Cut neither hedge, nor tree, in this, and the two next months. Beware of great thirst. Use light and thin dyet, much exercise, and chaste thoughts.

### July.

**A** July making, and getting in of Hay putt Hempe that is ripe. Gather garden Beanes. Get Rue, and Wormwood to strow vpon flowers to drive away Moathes, and Fleas. Fence your Coples, vse moderate dyet, and beware of great thirst, and taking colde suddenly. Beware of Physick. Bleed not, but vpon violent occasions.

### August.

**A** August bids you to follow your cozt harnest. Gather your garden seedes. Sow winter hearbes in the new of the Moone. Make Barly, and Vares. Gather Summer fruits and for health refraine sleeping after meate, in the day time. Shun feasts and banquets, and let Physicke alone.

### September.

**I**n this, and the end of the last Month, gather Hops when they waxe browne, the weather being faire, and no dew on the ground. Kill Bees. Make Meruice. Sow wheat, and Rye. Remoue, and set all slips of flowers betwene the two Lady dayes. Remoue trees, euer new Moone from September, vntill February especially in the new of the Moone, the weather faire, and warme, the Winde South, or West. Vse Physick moderately. Forbear fruits too plentiful, or rotten, and (as death) shun riot, and surfeiting.

### October.

**S**ow wheat, and Rye, but chiefly in the beginning, for feare of frost in the end. Set, and remoue young Trees, in the new of the Moone. Sow Acornes, and Nuts. Cut Rose trees (if you desire to haue store of Roses) but once in two yeares. Gather winter fruit, in the old of the Moone, the weather dry, and after Noone. Get warme clothing, and goe dry shod, and for health refuse not any Physick, from the hands of the learned.

### Novem-

## Woodhouse. 1633.

### November.

In the beginning of this Month, sow wheat, and Rye, in hot ground. Cut downe Ashes for Plasse timber; Make Malt. Kill Hogs, Trench gardens with dung. Set Crabtree stocks. Use wholesome meates, and drinks, with good exercise to preserve health.

### December.

In this & next Month cut downe great timber in field of Moone, Brush hedges. Uncover rootes of fruit Trees. Set Beanes, and Pease. Cover your best Flowers, and herbes, from frosts, and stormes, with rotten old horse dung. Lookes well to cattell. Let horses blood. Eat meates hot, and nourishing. Drinke good wine, and strong drinke. Keep thy body well clad, and thy house warme. Banish all cares from thy heart and conclude the yeare with feasting thy poore neighbours reloping together, that god about this time sent his onely begotten sonne into the world.

### Coniectures of weather by the Change, Full, and Quarters of the Moone.

When the Moone doth either change, be at the full, or enter into her first or last quarter, in Aries, Leo or Sagittarius, in Winter it is commonly sayre, but in Summer hot especially in June and July.

If she change, be at the full, or enter into the first or last quarter, in Taurus, Virgo, or Capricornus, it is like to be cold, but in Summer temperate.

When the said times be, in Gemini, Libra, or Aquarius, then look for winde, especially in the Spring, or Summer.

But if the Moone be new, at the full, or come to the first, or last quarter, in Cancer, Scorpio, or Pisces, in winter iudge of moist, and rainy weather and sometimes Snow, but in Summer, it will be good, and temperate weather, for the most part, yet sometime it raineth, and then especially, when Venus is aspected with the Moone.
